

Designer's Choice Perimeter System

Designer's Choice is a proven system that provides maximum design, finish and display options to meet ever changing retailing needs. Achieve the right look and functionality by selecting from the variety of standard components. Then dress up your store by adding moulding, special features, finishes and accents that match or complement your store interior. We encourage you to contact our experienced staff early in the design process.

Step-by-Step guide for designing perimeters with Designer's Choice Perimeter System:

1. Determine the best cabinet depth for each space.
Depths offset in 4" increments. (10" - 14" - 18" - 22" - 26")
2. Determine the best cabinet height for each space.
Heights offset in 10" increments. (82" - 92" - 102")
3. Choose upright thickness or combinations of thicknesses. ($\frac{3}{4}$ " - 6" within same run)
See pages 71-72
4. Choose design detail for upright front edges. ($\frac{3}{4}$ " taped edge - 6- $\frac{1}{2}$ " moulding)
See page 73
5. Choose header height and detailing. Headers are not required when top caps are used.
Header heights are 3- $\frac{1}{4}$ " or 6- $\frac{1}{2}$ ". *See page 77*
6. Determine best cabinet width and height which determines the length of kickboards and headers and the size of backs. Backs can be plain or slatwall.
7. Choose top cap detail, if included in the design. If headers are not used, top caps are required. *See pages 76, 79-82*
8. Choose Oak or Maple with clear lacquer or stained finish. Some designs are also available in wood-grained Oak or Maple Melamine.
9. Choose optional laminate (+) or color stripe (=). *See page 6*
10. Choose accessories. *See pages 87-88*

Example of a run of Designer's Choice Perimeter System:

Drawing #1 (page 67) illustrates one of many possible configurations and combinations of parts to create an attractive and versatile fixture run. Note that Headers are used in the center section only. Top Caps are optional when Headers are used and Headers are optional when Top Caps are used. Both Headers and Top Caps can be used for a heavier and more elegant look.

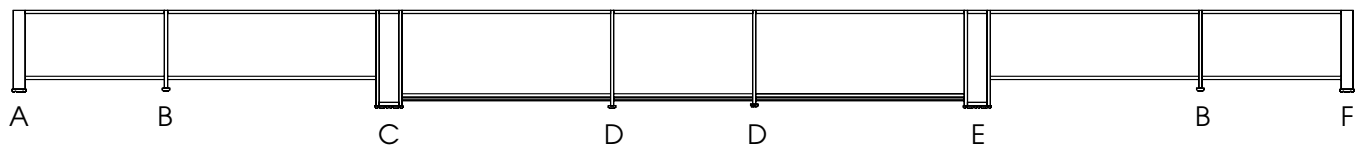

1. This run was designed with a combination of Upright thicknesses, depths and heights to add to the visual appeal.

2. Headers (used in center) usually match the moulding pattern applied to the front edge of the Uprights. Top Cap moulding is fabricated and precut for assembly onsite. *See pages 79-82* for Top Cap moulding options. All units in Drawing #1 have optional Door Kits for overstock storage. In this run, two slatwall backs and five standard backs are used. The accessories shown are typical of most installations.

3. For each run we provide a layout drawing as illustrated in Drawing #2 (same configuration as Drawing #1). Upright location is identified by letters (A, B...). Installers match the letter marked on each Upright to the letter shown on the drawing (A to A) (B to B), etc.. Below is a description of each upright.

See pages 71-73 for Upright front moulding options.

Drawing #2

- A - Left end Upright: 3" x 18" D x 82" H. Moulding Pattern 3P2 (1)
- B - Inside Upright: 3/4" x 18" D x 82" H. 1-3/4" Moulding Pattern 2P2 (2)
- C - Left Transition Upright: 6" x 22" D x 92" H. 6-1/2" Moulding Pattern 6P2 (1)
- D - Inside Upright: 3/4" x 22" D x 92" H. 1-3/4" Moulding Pattern 2P2 (2)
- E - Right Transition Upright: 6" x 22" D x 92" H. 6-1/2" Moulding Pattern 6P2 (1)
- F - Right end Upright: 3" x 18" D x 82" H. Moulding Pattern 3P2 (1)

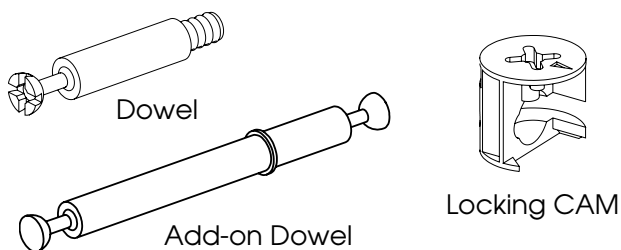

Drawing #3

Drawing #3:

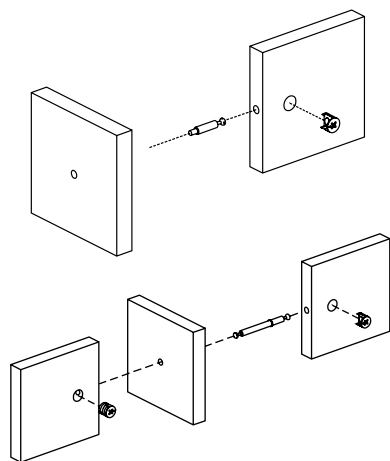

All Top Cap moulding is sent with a 3" horizontal back plate attached. Parts are precut to exact angles and lengths ready to be installed. Each Top Cap part is marked with a number (1, 2, 3, etc.). At the site the installer matches the part number to each number shown on the Top Cap layout. *See pages 79-82* for moulding pattern options.

Mini-fix to connect Designer's Choice

Install CAMS into the 15mm (just over $\frac{1}{2}$ ") holes with the arrow facing the direction of the $\frac{3}{8}$ " through-hole.

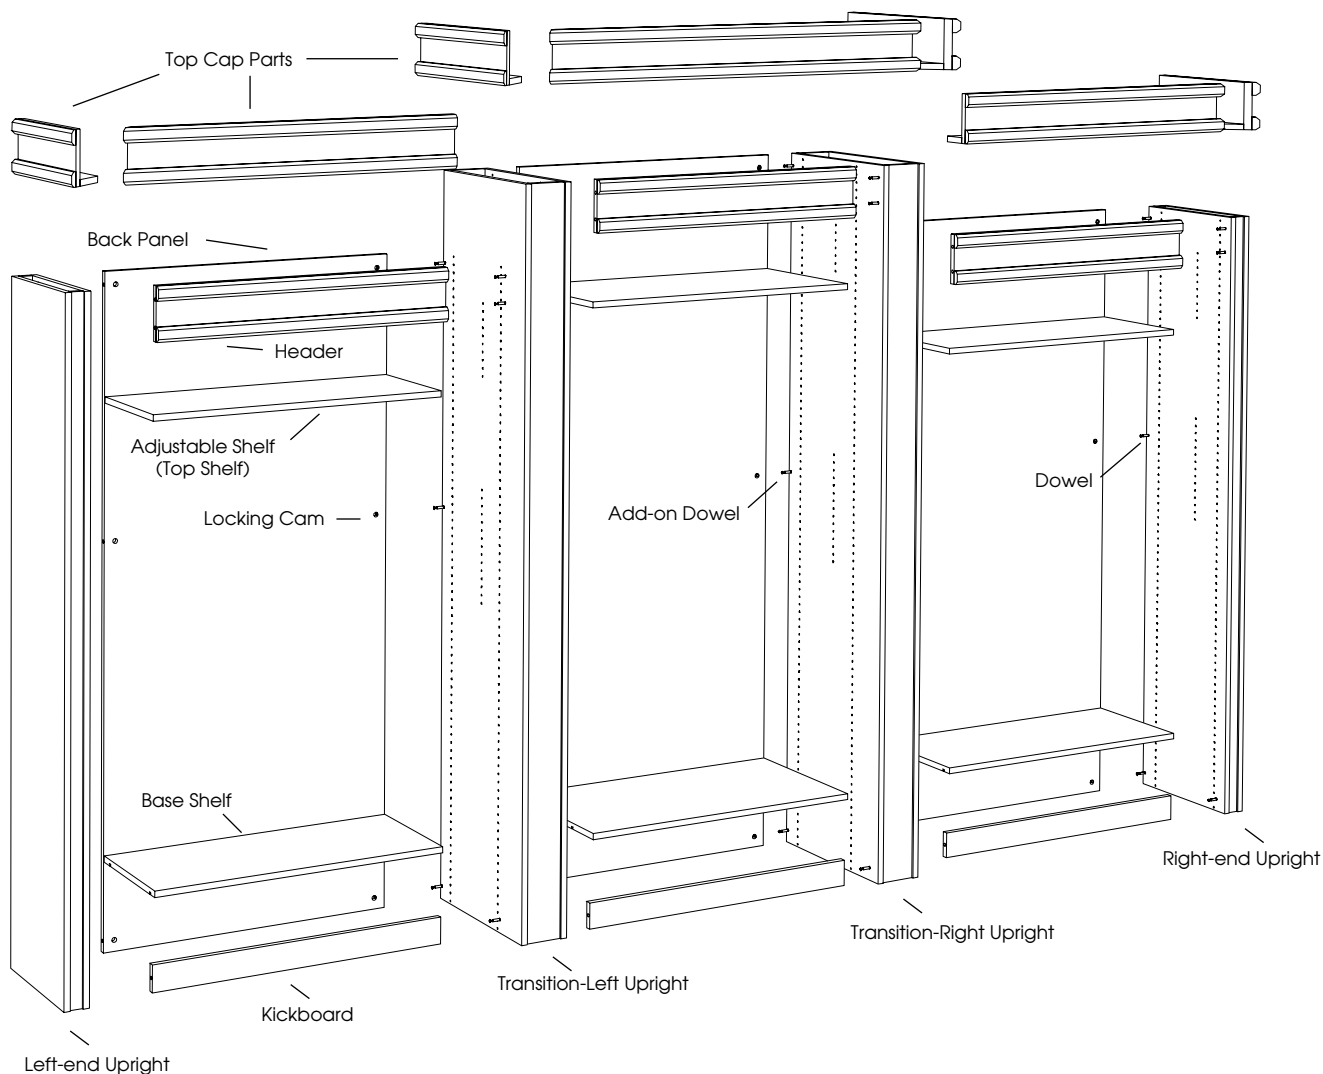

1. STARTER CONNECTION

To assemble (2) pieces perpendicular to each other (a back to a panel, a header to a side or a kickboard to side). Push CAMS into the holes. Screw DOWELS into the brass inserts. Slide the piece with the CAMS flush to the piece with the DOWELS protruding and tighten CAMS.

2. ADD-ON CONNECTION

To assemble (2) pieces edge-to-edge with a panel in-between. Install CAMS. Insert the longer end of the ADD-ON DOWEL through the in-between panel into the $\frac{3}{8}$ " through-holes on the first piece and tighten the CAM. The ADD-ON DOWEL should protrude through the in-between panel. Slide the second piece flush to the panel and tighten the CAM in the second panel.

Break-away of Designer's Choice Perimeter System run on page 69

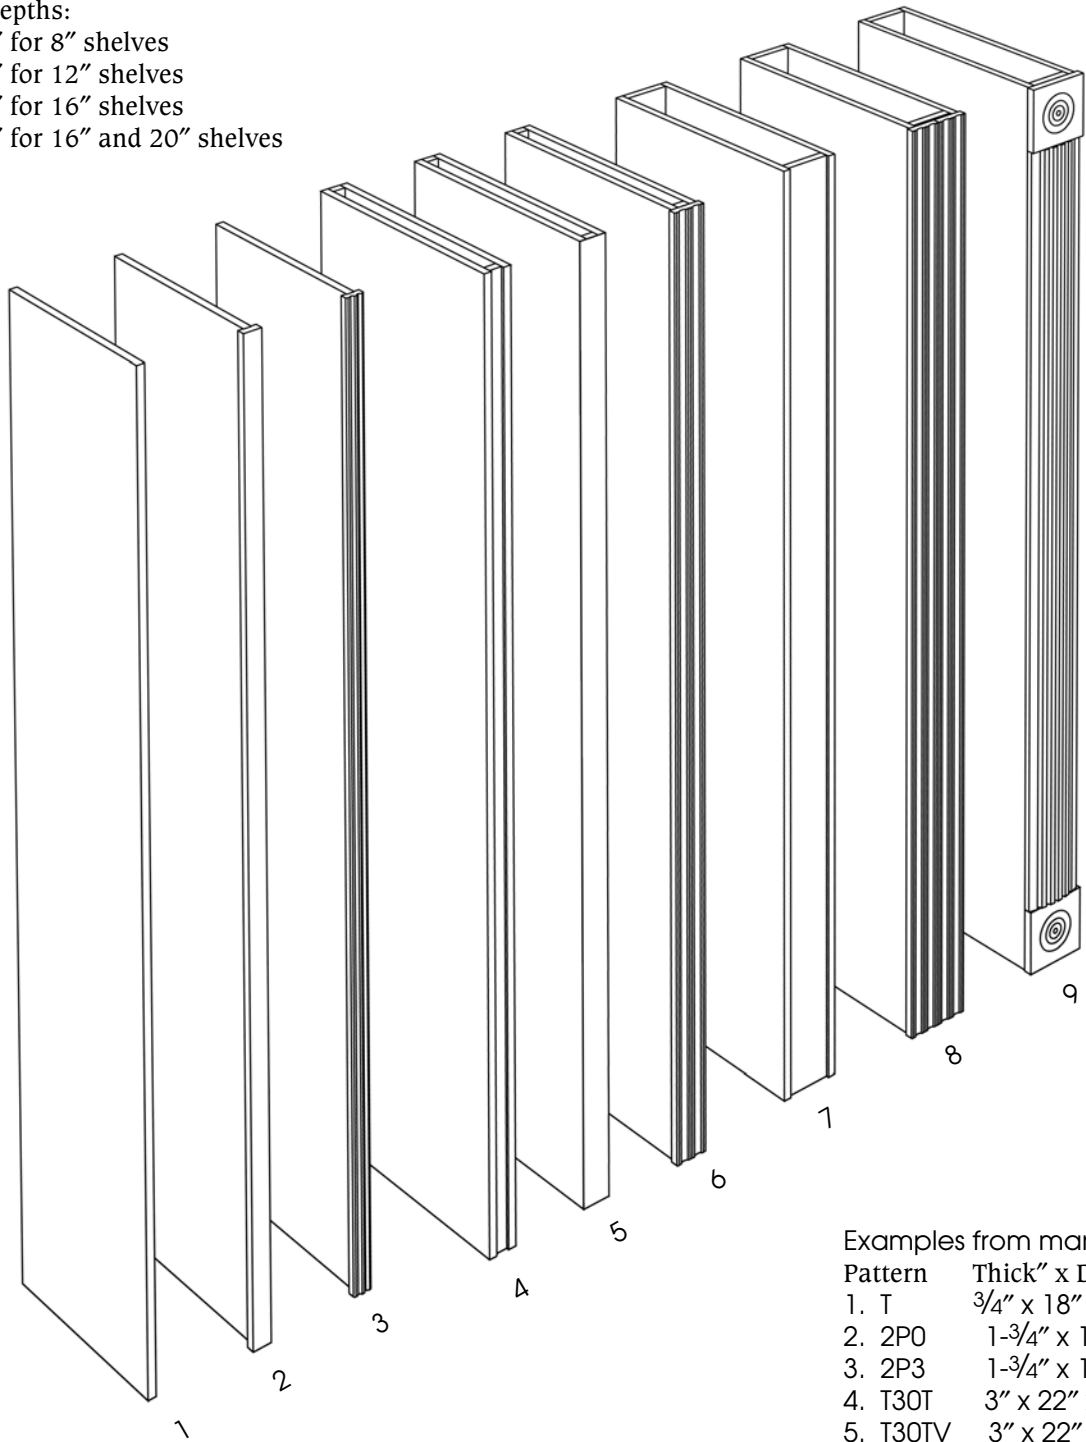

Designer's Choice Perimeter System Upright Panel Options

Designer's Choice is a truly versatile perimeter system that lets you choose Upright Panel thickness, height and depth to create your own special look for your specific merchandising needs. Pin holes 1" on center use steel pins to support adjustable shelves, hangrods and SlatRails. Mix or match any of the Upright Panels within the same cabinet run. See page 73 for front edge moulding patterns and page 5 for wood and finish options.

Panels can be ordered without pin holes to be used as partitions. Call for pricing.

- Panel thickness: 3/4", 1-3/4", 3", 3-1/4", 4-1/2", 6", 6-1/2"
- Panel heights: 82", 92", (26" D x 102" H available by quotation)
- Panel depths:
- 10" for 8" shelves
 - 14" for 12" shelves
 - 18" for 16" shelves
 - 22" for 16" and 20" shelves

See page 73 for additional front moulding options.

Examples from many options:

Pattern	Thick" x Deep" x High"
1. T	3/4" x 18" x 92"
2. 2P0	1-3/4" x 18-3/4" x 92"
3. 2P3	1-3/4" x 18-3/4" x 92"
4. T30T	3" x 22" x 92"
5. T30TV	3" x 22" x 92"
6. 3P1	3-1/4" x 22-3/4" x 92"
7. T60T	6" x 22" x 92"
8. 6P11	6-1/2" x 22-3/4" x 92"
9. 6P11C	6-1/2" x 22-3/4" x 92"

Designer's Choice Perimeter System Upright Panels

= uses optional accent stripe
+ uses optional laminate

Front Moulding Options

Upright Panels range in thickness from $\frac{3}{4}$ " to $6\frac{1}{2}$ " and can be mixed within the same run. Stock moulding patterns for each thickness are shown below. Color stripes (*see page 6*) can be added to moulding patterns which have an = sign. Laminates can be added to moulding patterns with a + sign. Moulding patterns with both an = and + accept both color stripes and laminates. All Upright Panels are available in Oak and Maple. Upright Panels with taped edges (T) only (no moulding) are also available in standard Oak-grained and Maple-grained Melamine. Other Melamine options are available by quotation.

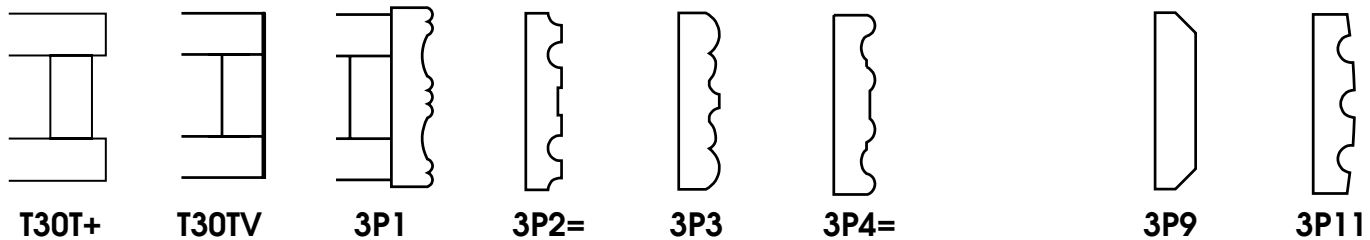

1- $\frac{3}{4}$ " Profile Trim Line Upright Panel Options

Trim Line Upright Panels are $\frac{3}{4}$ " thick. Moulding Options are $1\frac{3}{4}$ " wide.

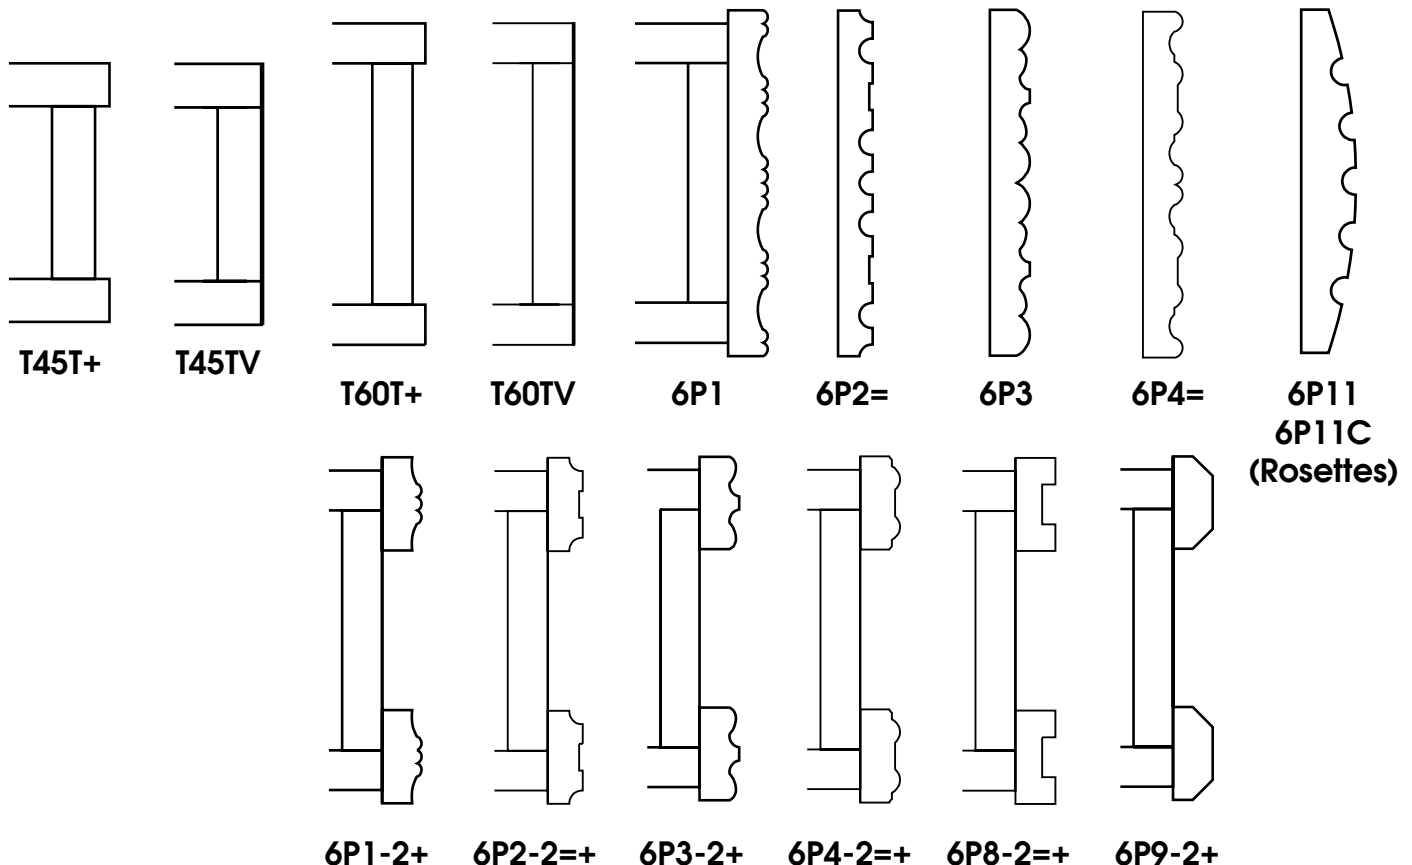

3- $\frac{1}{4}$ " Profile Grand Line Upright Panel Options

Grand Line Upright Panels are 3" thick and double-walled. Pattern T30T+ is recessed $\frac{1}{4}$ " to create an attractive detail as is, or $1\frac{1}{2}$ " laminate can be added to coordinate with your store colors. Pattern T30TV is faced with matching veneer giving the appearance of 3" solid wood. Moulding Options are $3\frac{1}{4}$ " wide.

6- $\frac{1}{2}$ " Profile Imperial Upright Panel Options

Imperial Upright Panels are $4\frac{1}{2}$ " or $6\frac{1}{2}$ " thick. Moulding Options shown are for $6\frac{1}{2}$ " Upright Panels only. Call for moulding for $4\frac{1}{2}$ " Upright Panels. The bottom row patterns use two pieces of the $1\frac{3}{4}$ " wide moulding patterns shown above with a space for laminate between them.

Upright Patterns (*page 73*) with = use optional accent stripes. Patterns with + use optional laminates. Laminates and stripes are not included in following pricing.

Moulding Patterns & Accent Stripes

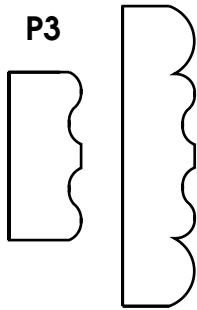

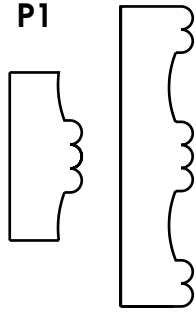

Trim fixtures and shelf edges with pattern moulding. For Top Caps and general use, mouldings can be ordered pre-cut, ready to install or shipped in nominal lengths. Custom moulding patterns and accent stripe colors are available for volume purchases. *See page 73* for additional patterns. *See page 6* for accent stripes.

Standard moulding patterns are available in 1-3/4", 3-1/4" and 6-1/2".

The Sign Board is a header. Accepts material up to ¼" thick. Use for signage or add other materials for color and texture.

Sign Board

Sign Board w/sign

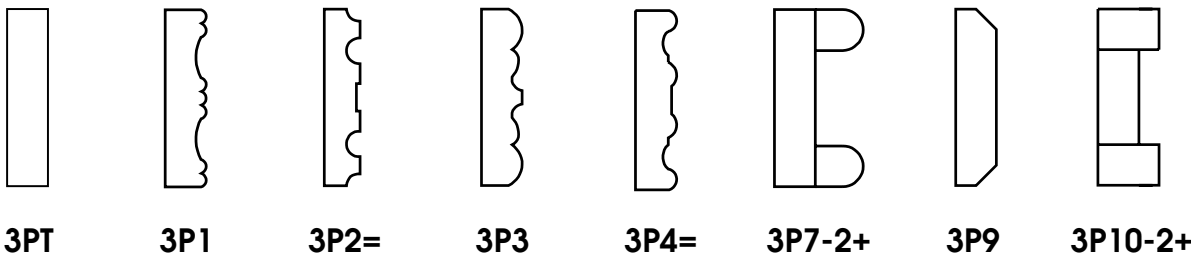

Designer's Choice Perimeter System Headers

= uses optional accent stripe
+ uses optional laminate

Moulding Options

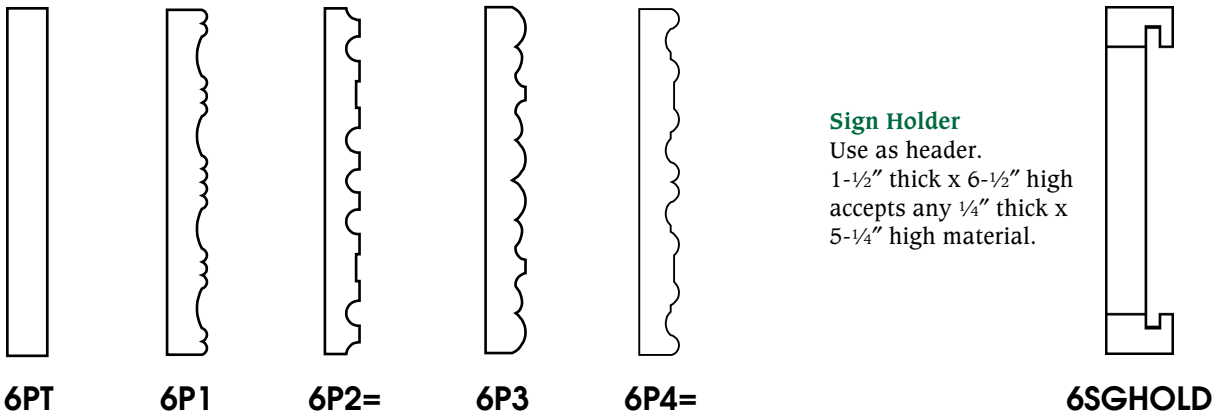

Headers are 3-1/4" and 6-1/2" high and can be mixed within the same run. Stock moulding patterns for each height are shown below. Color stripes (*see page 6*) can be added to moulding patterns which have an = sign. Laminates can be added to moulding patterns with a + sign. Moulding patterns with both an = and + accept both color stripes and laminates. All Headers are available in Oak and Maple. Headers with taped edges (T) only (no moulding) are also available in standard Oak-grained and Maple-grained Melamine. Other Melamine options are available by quotation.

3-1/4" Profile Header Options

6-1/2" Profile Header Options

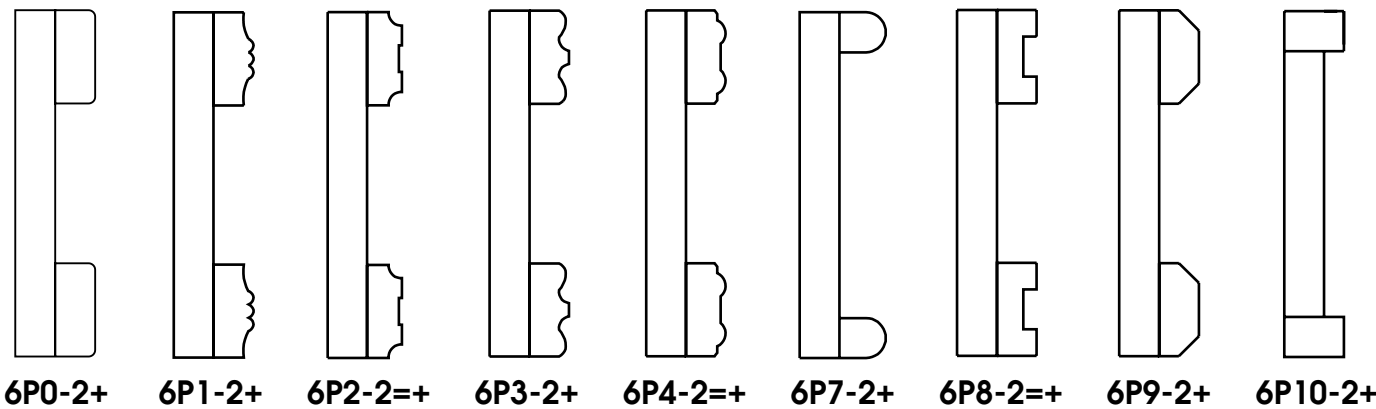

The bottom row patterns are 1-1/2" thick and use two pieces of the 1-3/4" wide moulding patterns shown above with a space for laminate between them.

Sign Holder
Use as header.
1-1/2" thick x 6-1/2" high
accepts any 1/4" thick x
5-1/4" high material.

6SGHOLD

Header Patterns (page 77) with = use optional accent stripes. Patterns with + use optional laminates. Laminates and stripes are not included in following pricing.

Designer's Choice Perimeter System Top Caps

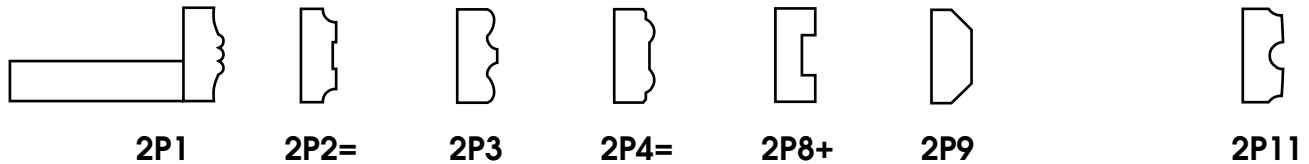

= uses optional accent stripe
+ uses optional laminate

Moulding Options - prices by quotation

Top Caps come pre-cut to size with a ledger attached ready for installation (no cutting is required onsite). Cut parts are numbered in sequence for easy identification. Color stripes (*see page 6*) can be added to moulding patterns which have an = sign. Laminates can be added to moulding patterns with a + sign. Moulding patterns with both an = and + accept both color stripes and laminates. All Top Caps are available in Oak and Maple, Option 3P10 (*see below*) are also available in Melamine.

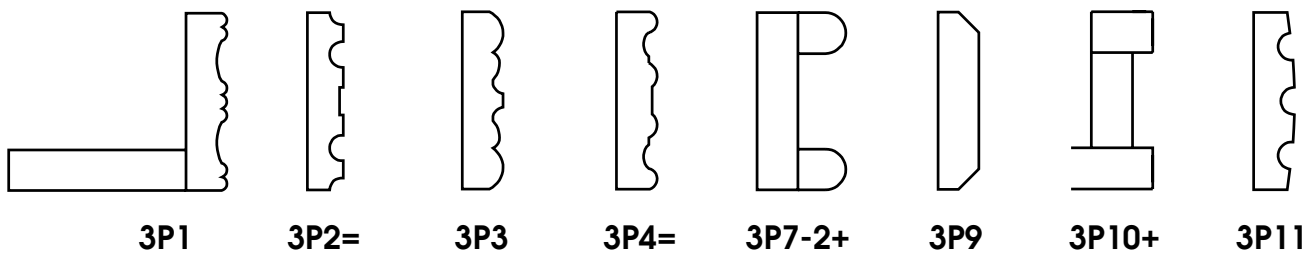

1-3/4" Profile Top Caps

1-3/4" high. Also use to accent other fixtures in this catalog.

3-1/4" Profile Top Caps

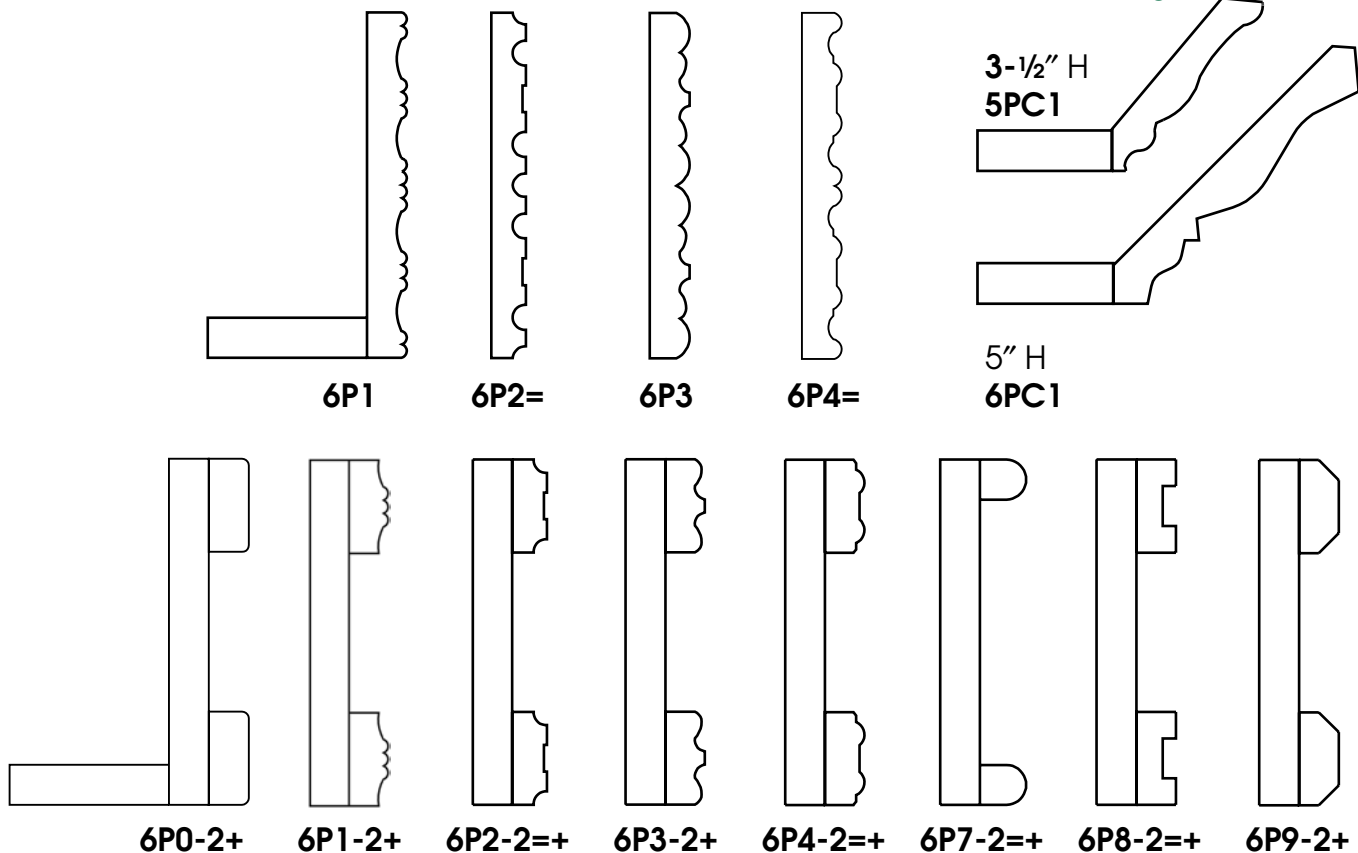

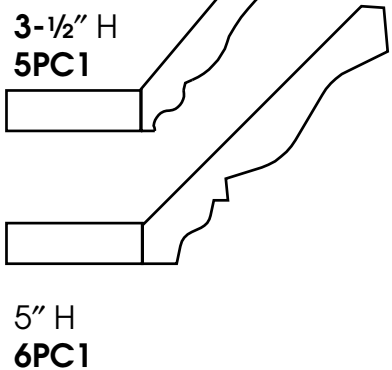

3-3/4" high. Also use to accent other fixtures in this catalog.

6-1/2" Profile Top Caps

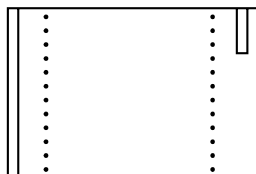

6-1/2" high. The bottom row patterns use two pieces of the 1-3/4" wide moulding patterns shown above with a space for laminate between them.

Crown Moulding

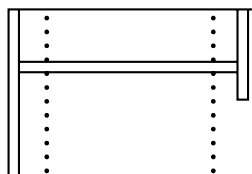

Below are several illustrations of Header and Top Cap possibilities for the Designer's Choice Perimeter System. There are few limitations, so choose combinations of components to fit your specific needs and preferences. See pages 81-82 for more examples.

Minimum requirements: Upright panels, Back Panel, Header *and/or* Top Cap, Kickboard and Base Shelf.

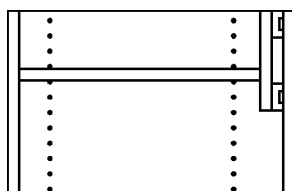

A. Header height options are 3-1/4" and 6-1/2". Shown is 3-1/2" H Header

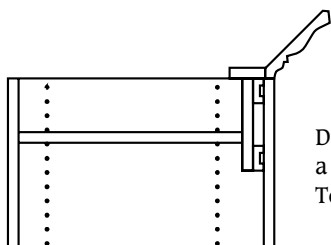

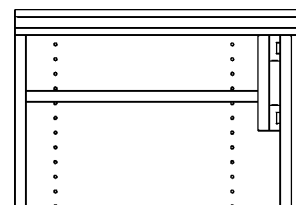

B. Upright Panel with 6-1/2" H Header and adjustable shelf used as a recessed top.

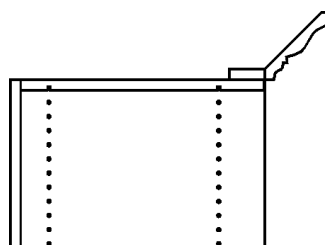

C. Moulding added to Upright Panel. Shown with Header with double-pattern moulding and adjustable shelf used as recessed top.

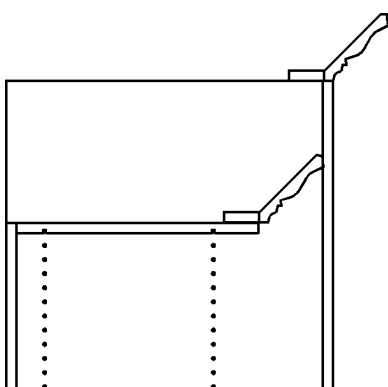

C1. Same as C with a Panel Cap mounted on top of each upright (see page 82)

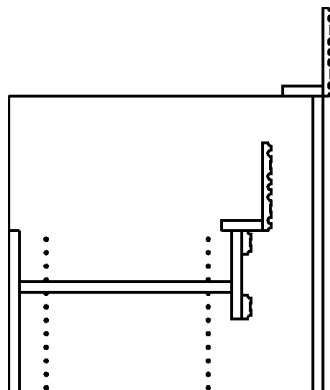

D. Same as C with a Crown Moulding Top Cap (see page 82)

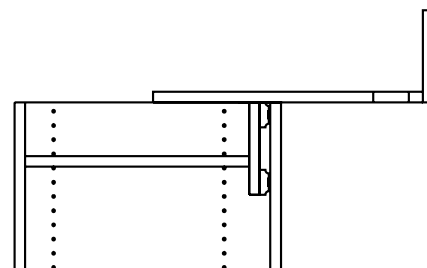

E. When using a Top Cap without a Header, a top shelf is recommended. Omitting the Header increases the vertical display space.

F. All Transition Uprights have a left side and a right side. Connector holes for Headers and Kickboards on the left match Uprights to the left of the Transition Upright. Holes on the right of the Transition Upright match Uprights to the right. Shown: Crown Moulding at two levels, 10" and recessed 4".

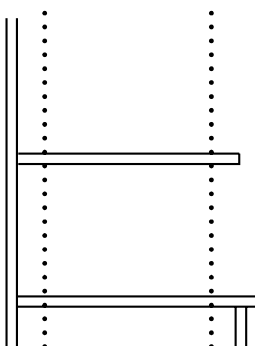

F1. A transition Upright with moulded Header and Top Cap.

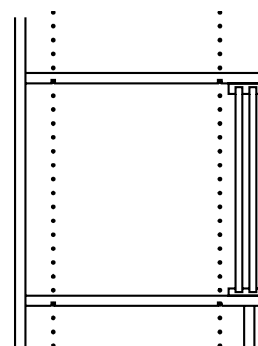

F2. Top Cap can be extended to include lighting. (Inline run only, no stairstep.)

G. A Kickboard and Base Shelf are required for the bottom. Shown with a Base Shelf and one Adjustable Shelf. Full depth Base Shelf can also be used as an Adjustable Shelf.

H. Bottom enclosed using a sliding Door Kit. Requires a second Base Shelf to form the top of the storage cabinet.

A. Stained Oak Upright Transition-left, Crown Moulding Top Cap and custom Tie Bin Insert.

B. Clear Maple Upright Transition-right with Top Caps (no Headers).

C. Clear Maple Left-end Upright with 2P1 Moulding and Panel Cap.

D. Black stained Oak with Add-on, 6" Headers and Panel Cap.

E. Clear Maple inside Upright and Headers with matching laminate detail.

F. Clear Maple Transition-left Upright with Header and Top Cap with Stripe.

G. Maple Melamine right end Upright with painted trim and Crown Moulding.

H. Stained Maple Transition-right Upright with Headers and Top Cap.

I. Maple Melamine right end Upright with Painted trim and Crown Moulding.

Header optional if Top Cap used

Crown Moulding

J. Clear Maple Transition-right Upright with 10" vertical and 4" offsets. Both Headers and Crown Moulding Top Caps used.

K. Clear Maple left-end Upright with rosette and fluted moulding. Headers and Top Cap include pattern moulding.

L. Heavy Clear Maple right-end Upright with matching Header and Top Cap.

M. Heavy stained Maple left-end Upright with matching Header and Top Cap.

P. Painted right-end trim Upright with matching Header and Crown Moulding.

N. 3-1/4" Upright with matching moulding pattern for Header and Panel Cap.

O. 1-3/4" Upright with matching moulding pattern for Header and Panel Cap.

A. 18" D x 49-1/2" W x 92" H
Single cabinet with taped edges (PT) includes Uprights,
Back Panel, Header, Kickboard and Bottom Shelf
As Shown: \$693.00 in Melamine **\$401.00**

B. 18" C x 54" W x 92" H
The same single cabinet with
3" Uprights (T30T) with five shelves.
As Shown: \$1,199.00 in Melamine **\$784.00**

C. 14" D x 147" W x 92" H
Three cabinet run with taped edges (PT).
As Shown: \$2,379.00 in Melamine **\$1,351.00**

D. 14" D x 147" W x 92" H + Crown
The same three cabinet run with painted
Upright Moulding and Crown Moulding Top Cap.
As Shown: \$2,779.00 in Melamine **\$1,751.00**

These photos show how a simple design can be upgraded with Designer's Choice Perimeter System options. The inside cabinet dimensions are the same on all three sections, but the appearance changes dramatically by varying the Upright thickness and moulding patterns on the Uprights, Headers and Top Caps.

A. 22" D x 147" W x 92" H
Uprights and Headers with 3/4" taped edges (PT).
Shown without accessories.
As Shown: \$1,767.00 in Melamine \$1,018.00

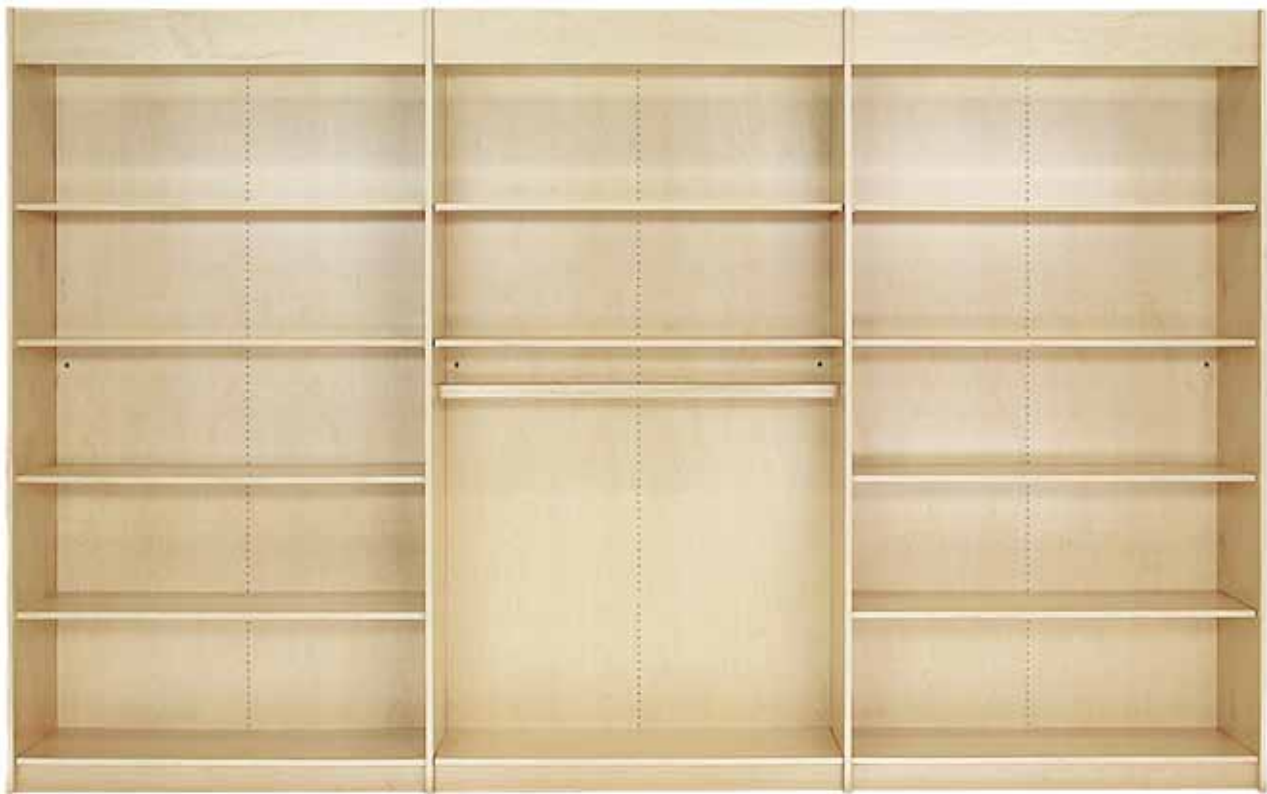

B. 22" D x 162" W x 92" H + Top Cap
6" Thick Uprights (T60T) inside and
3" Thick Uprights (T30T) outside. Headers
and Top Caps with Moulding Pattern 6P9-2.
See page 69 for photo of this same run with
laminates. Accessories include Adjustable
Shelves upgraded with P2 Moulding on
front edge, Hangrod and SlatRail with
Waterfall Faceouts.
As Shown: \$3,592.00

Header optional if Top Cap used

C. 22" D x 156" W x 92" + Crown
3" Thick Uprights (3P3). Headers (6P3)
and Crown Moulding Top Cap (6PC1).
Accessories include Shelves, Hangrod,
SlatRail and Waterfall Faceouts.
As Shown: \$3,614.00

A. 18" D x 147" W x 92" H
 Three cabinet run with taped edges (PT).
 Accessories include Adjustable Shelves and Hangrod.
 As Shown: \$2,293.00 in Melamine **\$1,301.00**

B. 22" D x 162" W x 92" H + Top Cap
 6" Thick Uprights (6P11C) w/rosettes outside and 3" Thick Uprights (3P11) inside. Headers and Top Caps with Moulding Pattern 6P11-2. (Headers optional if Top Caps are used.) Top Cap projects 10" to accommodate lights. Accessories include Adjustable Shelves, Hangrod, SlatRail and Waterfall Faceouts.
 As Shown: \$4,336.00

A. 22" D x 147" W x 92" H

Three cabinet run with taped edges (PT) has same inside dimensions as run shown below. The shorter unit inside creates a stair-step. Accessories include Adjustable Shelves, Hangrod and SlatRails with Waterfall Faceouts.

As Shown: \$2,422.00 in Melamine **\$1,257.00**

B. 22" D x 162" W x 92" H + Top Cap

Three cabinet run with 6" Thick Uprights (6P2) outside and 3" Thick Uprights (3P2) inside with Headers (6P9-2) has same inside dimensions as run shown above. Caps (6P9-2) added to outside cabinets. (Headers optional if Top Caps are used.) Accessories include Adjustable Shelves.

As Shown: \$3,802.00

prices: \$ wood / \$ stain / \$ melamine

Slatwall Backing

6" on center single-sided slatwall with metal inserts for strength. Use inside or outside cabinet. Facing outside it allows front and back merchandising when cabinets are used as partition or window display.

Back Panels for Designer's Choice

Choose standard, Slatwall or Slatwall w/metal channels.

NOTE: only one side finished – upcharge to finish both sides.
